Other requirements

At least two-year experience in any programming language gained during studies or individual work. It is essential that the intern knows Photoshop, Illustrator, Blender or any 3D modelling software. Additionally, knowledge of the programming language (Python, PHP, Java, knowledge of different frameworks) is desirable. The trainee should have the background in telecommunication networks, network security, SQL.
SCRUM and Microsoft Azure will be an advantage.

WORK OFFERED:**Kind of work:**

Office

Work description:

The intern will handle everyday tasks of the company. Responsibilities will depend on his/her own experience and knowledge in particular fields. The company is dynamically developing on many different fields of interests, among which we can distinguish:

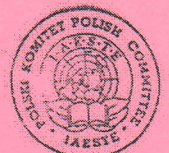

- 3D modelling of different products and mechanical parts which will be printed in 3D,
- IT programming: developing company's sites, debugging problems, supporting systems deployed at customer's sites,
- contributing to the general development of the company.
